RE: Permit Applicability Determination  
SWN Production Company, LLC  
CHK APP A

Determination No. PD16-069  
Plant ID No. 103-00119

Dear Ms. Suszkowski:

It has been determined that a permit will not be required under 45CSR13 for your natural gas production facility. This determination is based on information included with your permit determination form dated November 29, 2016 and received on December 2, 2016, and additional information received on January 9, 2017 which indicates that the increase in emissions will not exceed two (2) lbs/hr OR five (5) tons/year of total Hazardous Air Pollutants (HAPs); six (6) lbs/hour AND ten (10) TPY of any regulated pollutant; or, trigger a substantive requirement of any State or Federal air quality regulation.

Please bear in mind, however, that any additional changes to the proposed facility may require a permit under 45CSR13. Furthermore, pursuant to 45CSR13-5.14, records briefly describing the facility, the pollutants involved, the potential to emit for each pollutant shall be maintained by the owner or operator for at least two years and made available to the Director upon request.

Should you have any questions, please contact the undersigned engineer at (304) 926-0499 ext. 1203.

Sincerely,

Jonathan Carney  
Engineer
